RE: Drilling Bid Specifications
Saegertown Industrial Area Site
Saegertown, Pennsylvania
Project No. 60882

Dear Ms. Chulick:

Attached are the drilling specifications sent to prospective drilling contractors. Bernice Pasqual had requested a copy during an earlier telephone conversation.

We are preparing to initiate field investigation activities at the site. Information on private and Borough water supply wells is being assembled. A drilling subcontractor will be chosen the week of November 19. We anticipate beginning soil gas sampling the week of November 26. Drilling of shallow soil borings or monitoring wells will likely begin the following week. We will be in contact with you to establish starting dates for these activities.

Sincerely,

WARZYN ENGINEERING INC.

Alan J. Schmidt
